Frontend	Next.js 16, React 19, Tailwind CSS, ShadCN UI, Framer Motion
State & Data	Redux Toolkit, React Query (TanStack), SWR, Axios, Context API
Tools/Backend	Git, Docker, Figma, Node.js, Express, PostgreSQL

EXPERIENCE

Momentum Labs

Frontend Developer and Designer

Apr 2025 – Present

San Diego, USA (Remote)

- [VoiceDrop.ai](#) — Architected a scalable **design system** from scratch for a production **MVP**; engineered the **internal CRM UI** and optimized critical user flows, directly reducing churn by **24%** and improving retention.
- [1Lookup.io](#) — Developed a responsive **landing page** and led the design of a comprehensive **internal CRM design system**, improving component reusability and design consistency across the product.
- [1Capture.io](#) — Designed and implemented an end-to-end **landing page** experience, applying principles of visual hierarchy and conversion-focused UI to drive user engagement.
- [TeamPredict.ai](#) — Designed a **data-driven internal dashboard** with structured data views and intuitive layouts to surface actionable insights for stakeholders efficiently.

Codify

Fullstack Intern

Sep 2025 – Nov 2025

Rawalpindi (On-site)

- Built **reusable React components** following best practices for maintainability and consistency, reducing redundant code across the codebase.
- Developed responsive, data-driven **dashboards** using **React** and **Next.js**, improving internal data visibility and enabling faster decision-making.

Headstarter

Software Engineer Intern

Sep 2025 – Nov 2025

New York, USA (Remote)

- Collaborated in a team of 4 to design and develop a **full-stack SaaS product** from the ground up.
- Contributed to achieving a target of **1,000+ users** through iterative development and rapid deployment.
- Participated in **live workshops and hackathons**, building and shipping projects under tight deadlines.

PROJECTS

Wild Oasis (ongoing) ([Visit](#)): A full-stack hotel management platform built with React.js, TanStack Query, and Supabase, covering end-to-end booking, guest, and room management with real-time updates and secure authentication.

syncode ([Visit](#)): Engineered an interactive e-learning platform for C++ featuring a custom-built algorithm to capture fully interactive coding tutorials with real-time user interaction, achieving up to 95% reduction in video file size compared to traditional screen recording approaches.

CERTIFICATES

The Web Developer Bootcamp ([Visit](#))

Google UX Design ([Visit](#))

Meta Front-End Developer ([Visit](#))
