SUMMARY

Full-stack developer with over a year of production SaaS experience. Reduced churn by 14% on a CRM serving 12,000+ users and built the scalable design system architecture using React, adopted across all company products. Seeking a mentored software engineering position in a reputable company to grow alongside senior engineers and learn new stacks.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, Python, C++, SQL

Frontend: React.js, Next.js, Redux Toolkit, TanStack Query, Tailwind CSS

Backend & APIs: Node.js, Express.js, FastAPI, RESTful API Design

Databases: PostgreSQL, MongoDB, Prisma ORM, Schema Design & Query Optimization

Testing & Process: Jest (unit + integration), Git/GitHub, Code Review, Agile/Scrum

Also Familiar With: AWS, Docker, CI/CD (GitHub Actions), Vercel

EXPERIENCE

Frontend Engineer (Freelance Contract)

Apr 2025 – Aug 2026

Voicedrop

Remote, USA

- Cut user churn 14% across a 12,000+ user SaaS CRM by redesigning onboarding flows and optimizing React.js component performance.
- Cut cross-team feature delivery time by building a reusable, maintainable React.js design system adopted across all company products by a team of 4+ engineers.
- Shipped 3 production CRM features end to end (prototype, React.js UI, Node.js/Express.js REST API), protected by Jest unit and integration tests on critical components and endpoints.

Full Stack Intern

Sep 2025 – Nov 2025

Codify Private Limited

Rawalpindi, PK

- Shipped an ordering feature on schedule with zero post-handoff bugs in a MERN-stack restaurant ordering app by building, testing, and troubleshooting across the full stack.
- Built a client-facing dashboard on RESTful APIs that gave the client real-time visibility into production data, working alongside a senior developer.
- Followed the team's Agile process and development standards: Git feature branching, pull requests, and peer code review.

Software Engineering Fellow

Jul 2024 – Aug 2024

Headstarter

Remote, USA

- Built an AI SaaS product end to end with a 4-engineer team through hackathon sprints and structured SDLC workshops, targeting 1,000+ users.

PROJECTS

MyKhata — AI-powered personal finance tracker

[GitHub](#) | [Demo](#)

Next.js, PostgreSQL, Claude API

- Built a full-stack personal finance tracker with session-based authentication and interactive spending analytics.
- Designed an AI expense assistant on the Claude API with schema-constrained structured output.
- Automated PDF statement reporting: branded statements are generated on a Vercel Cron schedule and delivered by email.

Sendrite — desktop AI writing assistant

[GitHub](#) | [Demo](#)

Electron, TypeScript, koffi

- Built a desktop application that rewrites highlighted text in any text box without leaving the current window.
- Kept the UI responsive even though the model call takes roughly 90% of wall-clock time, using speculative prefetching to reduce perceived latency.

Syncode (FYP) — in-browser C++ compiler for e-learning

[GitHub](#) | [Demo](#)

C++, React, Supabase

- Designed and built a custom C++ compiler integrated into a video streaming platform, enabling students to write and execute code interactively while watching lectures.
- Implemented role-based access control (RBAC), letting teachers record, publish, and review lecture submissions while students securely submit assignments.

EDUCATION

Bahria University

Islamabad, PK

Bachelor of Science in Computer Science

Sep. 2021 – June 2025
