EDUCATION

Bahria University, Islamabad

Bachelors of Science in Computer Science

Sep 2021 - Jun 2025

EXPERIENCE

Product Design Engineer (Contract)

Voicedrop

Apr 2025 - Aug 2026

Remote, USA

- Redesigned the onboarding flow and optimized React rendering performance, cutting post-onboarding user churn by 14%.
- Architected and maintained a shared, reusable design system, reducing UI build time per feature across all company products.
- Translated user needs into interactive prototypes and production-ready React components backed by RESTful APIs, improving CRM usability for end users.

Full-Stack Developer Intern

Codify Pvt Ltd

Jan 2025 - Feb 2025

Rawalpindi, Pakistan

- Built and debugged features for a restaurant ordering app using the MERN stack, shipping new functionality on schedule with clean, bug-free handoffs.
- Designed and built a client-facing dashboard alongside a senior developer, integrating RESTful APIs to display live production data.
- Followed Agile workflows with Git feature branching, pull requests, and peer code review to keep PR turnaround fast and consistent.

Software Engineer Fellow

Headstarter

Jul 2024 - Aug 2024

Remote, USA

- Collaborated with a team of 4 engineers to design and develop an AI SaaS product end-to-end, targeting 1000+ users.
- Built SDLC and applied-AI development skills through hackathons and workshops as part of Headstarter's fellowship program.

PROJECTS

Sendrite.ai

Node, TypeScript, Electron, koffi

[Live Link](#)

- Built a desktop application that rewrites highlighted text in any text box without leaving the current window.
- Reduced perceived latency via speculative prefetching, keeping interactions responsive despite the model call accounting for 90% of wall-clock time.

Syncode

C++, React, RBAC, Supabase

[Live Link](#)

- Designed and built a custom C++ compiler integrated into a video streaming platform, enabling students to write and execute code interactively while watching lectures.
- Implemented role-based access control (RBAC), letting teachers record, publish, and review lecture submissions while students securely submit assignments.

Zephira

TypeScript, Zod, Tanstack Query, API

[Live Link](#)

- Built a fully responsive weather app with interchangeable map types.
- Used Zod to validate incoming data from the OpenWeather API.

ACHIEVEMENTS

Google Core Lead

Won a poster design competition, contributing to the launch of the university's first-ever and largest DevFest event by Google Development Students Club. 2023

TECHNICAL SKILLS

Languages: JavaScript, Python, C++, SQL

Frontend: React, Next, TypeScript, JavaScript ES6+, Redux Toolkit RTK, TanStack Query, Tailwind CSS, HTML, CSS

Backend: Node.js, Express.js, FastAPI, RESTful API Design, JWT/Sessions

Database: PostgreSQL, MongoDB, Schema Design & Query Optimization, Prisma

AI/LLM Integration: Third-party LLM & AI Service Integration

Tools: Figma, Git, GitHub, Docker, Vercel, AWS EC2, Postman, VS Code, Cursor, Claude Code

RELEVANT COURSEWORK

OOP, Data Structures and Algorithms, Databases, Operating Systems, Project Management, Usability Engineering
